To Whom It May Concern

Wayne Dobson of Rococo Homes has built two homes for us, one a double story, the other a single story, both are brick veneer with tiled rooves.

The houses were designed by Wayne to meet our specific requirements; they both contain many internal and external features that we consider unique and both were designed and built to compliment the blocks and the surrounding areas.

We found Wayne to be extremely creative, well informed on all aspects of internal and external design, well organised and easy to deal with.

The prices we paid to Wayne to construct our houses were competitive with the market at the time and the results we achieved certainly justified us choosing him as our builder.

Both projects were well managed, all sub contractors used meet his strict requirements and both homes were completed on time and more importantly without any problems for us to worry about.

We have absolutely no hesitation in recommending Wayne Dobson to build your home.
